

## Security and Browser Requirements

### Security Issues

To help maintain security, you should close your browser when you have completed your Internet banking session. This will help prevent unauthorized persons from viewing your private account information.

Never share your password with another person. Keep your password secret.

### Browser Requirements

To help ensure security and proper functionality, you must use a browser that meets or exceeds the following requirements:

- 128-bit encryption
- You must have Cookies and JavaScript enabled
